The screenshot shows the Heroku dashboard interface. At the top, there's a green header bar with the URL "dashboard.heroku.com/apps". Below it is a blue navigation bar with the "Salesforce Platform" logo. The main content area has a purple background with a sunburst and cloud illustration. On the left, there's a "Personal" dropdown menu and a "New" button. The central part features two main calls-to-action: "Create a new app" (with a hexagonal icon) and "Create a team" (with a people icon). Both sections include descriptive text and a "Create [action]" button. At the bottom, there's a section for language guides with icons for Node.js, Ruby, Java, PHP, Python, Go, Scala, and Clojure.

The screenshot shows the Heroku dashboard for the application "heroku-sales-deployment". The top navigation bar includes links for LISL, ML, Max, pytl, pan, How, ML, Hov, Dor, Cor, Git, Git, and heroku. A Salesforce Platform tab is also visible.

Automatic deploys

Enables a chosen branch to be automatically deployed to this app.

Enable automatic deploys from GitHub

You can now change your main deploy branch from "master" to "main" for both manual and automatic deploys, please follow the instructions [here](#).

Every push to the branch you specify here will deploy a new version of this app. **Deploys happen automatically:** be sure that this branch is always in a deployable state and any tests have passed before you push. [Learn more](#).

Choose a branch to deploy

heroku

Wait for CI to pass before deploy

Only enable this option if you have a Continuous Integration service configured on your repo.

Enable Automatic Deploys

Manual deploy

Deploy the current state of a branch to this app.

Deploy a GitHub branch

This will deploy the current state of the branch you specify below. [Learn more](#).
